

The many advantages of dental implants

1 Improve your confidence - If you are ever worried that your denture will move or slip, then the fixed security and life-like appearance of dental implants will help.

2 Enjoy your favourite foods - Because dental implants are fixed you can eat what you like, and because there is no palate you can taste things again, and appreciate hot foods, or that cold beer!

3 Natural, life-like appearance - Dental implants offer a beautiful natural appearance and can match your other existing natural teeth or can be used to improve your appearance and smile.

4 Better for your oral health - Unlike bridges, dental implants do not damage adjacent natural teeth; and unlike dentures they do not encourage food and plaque build up between supporting teeth.

5 Long lasting solution - Provided they are carefully cleaned and looked after, dental implants will usually last longer than crowns, bridges or dentures. If you maintain them well and your mouth stays healthy, then they will last years and probably for your life time.

6 Preserve healthy bone - When your natural tooth is removed, the bone within the jaw that supported it dissolves away. Placing a dental implant to replace the tooth helps to conserve that bone and avoids the appearance of a shrunken jaw.

7 No more taking your teeth out at night - Because dental implants provide a fixed tooth replacement, there is no need to remove them at night time.

8 Substitute for a natural tooth root - Made from titanium, dental implants can be used to replace individual teeth, larger gaps or even all the teeth in a jaw. They are also used to stabilise a removable denture.

9 Precision placement - We use a 3D x-ray /Cone Beam CT Scan to accurately and safely place the dental implant. Using cone beam technology takes the guess work out of implant surgery. We know exactly where to place the implant and if there is sufficient bone beforehand.

10 Love your smile again - Dental implants are as close as it is possible to get to a natural tooth, both in function and in appearance.

“Excellent dentists and super friendly staff”

Our experienced implant surgeon, Dr Allen Betsis and his well trained implant team take great care of our patients.

Dr Allen has placed more than 1,000 dental implants and holds an MSc in Implantology and Dental Surgery, an advanced surgical qualification he gained in Germany.

Dr Allen insists on using the very best materials on the market, which is why we only place Nobel Biocare implants at Prime Dental, a tried and tested global brand that has been around for over 20 years, so is well established, highly regarded and ensures optimal results.

His expertise means he has carried out a huge range of implants from routine to advanced implant cases requiring bone grafting procedures.

Our practice is one of the most technologically advanced in the area and we use 3D CBCT scanning for precision placement. Our service continues with dedicated hygiene care, implant after care, and annual reviews to make sure all is well and ensure the longevity of the implants.

Our initial consultation fee is £95 and implants start from £3,500. We are pleased to work with the specialist finance provider Chrysalis Finance in offering a range of finance plans enabling our patients to spread the cost, very often on an 'interest free' basis. Please ask us for details.

Still unsure? Please visit us for an implant consultation with Dr Allen, who will be happy to answer any questions you may have. We look forward to hearing from you.

Dr Allen Betsis

GDC no. 267101
